The Covid 19 pandemic that began in March 2020 and the subsequent measures undertaken to control this pandemic have affected the smooth functioning of the Ulu Muda Scientific Expedition and the normal activities of the branch. The lockdown and Movement Control Order (MCO) were more stringent in 2021 as Covid cases soar with new strains of the virus emerging. Like all NGOs and association , MNS has to adjust in compliance to the new normal with restricted outings, delayed implementations of projects and postponement of meetings.
